

Industrias Ferri S.A. work to deliver equipment and services in order to satisfy the needs and requirements of our clients.

We apply our profound knowledge and experience, obtained over the years, to all our products and services in order to

- Obtain the full satisfaction of our clients with innovative technical, reliable and high quality solutions.
- Be known for our integrity and professional ethics in all our professional dealings.
- Focus our attention on safety, avoiding product defects, pollution, and damage and risks to the health of our workers.

Industrias Ferri S.A. realise the importance of integrating quality management, environmental management and security and health at work management within our strategy. As equipment designers, manufacturers and suppliers in the maritime and quarrying sectors, as well as inspection and repair services, we

- Promise to abide by the Law and any other agreement signed by the company.
- Shall ensure all levels of our organization work with the aim of continually improving our products and processes, our environmental behaviour and safety and health conditions at work.
- Carry out our activity with environmental responsibility; we create work methods and habits which encourage recycling in order to optimize resources, minimizing waste and being energy-efficient.
- Look for the safest way to work, minimizing all risks, and involving all members of the organization in complying with all safety norms.
- Continue to improve and innovate in the development of machinery and technical services, ensuring the highest quality.

These lines of action will follow specific objectives established and reviewed yearly.

This policy is dictated by Management who assume responsibility for promoting it, making it public and assigning all necessary resources for its application.

Gondomar, November of 2015

Patricio Fernández Goberna

CEO
